

Pathology and Laboratory Medicine

Your regional resource for subspecialized diagnostic consultation

Pathology and Laboratory Medicine at The University of Kansas Health System is the region's premier diagnostic medicine program. Under the direction of new leadership, a comprehensive subspecialized model is now offered to the state of Kansas and beyond.

With 26 subspecialized areas, a team of 25 physicians and staff is positioned to support the most complex cases within the health system and beyond.

Leaders in academic medicine

Affiliated with the premier pathology teaching program in the region, in collaboration with the largest multispecialty practice in the state of Kansas, more providers choose The University of Kansas Health System as their diagnostic partner.

As subspecialized scientists, our board-certified physicians are nationally recognized leaders in research focused on cancer, neurosciences and women's reproductive health. Research includes basic science and translational (bench-to-bedside) research on cancer biology, developmental biology and cell differentiation, stem cell biology, and microbial and viral pathogenesis.

Accreditation

Pathology and Laboratory Medicine is accredited by the American Association of Blood Banks, the College of American Pathologists, the Foundation for the Accreditation of Cellular Therapy and the Clinical Laboratory Improvement Act.
